Save software (2021)

Instruction for installing and setting up LINA software

The goal of this software is to protect scientific data from the member of this institute (permanent and non-permanent) stored on computers (laptop or desktop) which have been bought with public funding. This is an professional obligation to protect the result of the science of this institute Personal data can be saved too but they should be clearly identified by an explicit folder name (private, personal,...)

Installing

Operating systems MacOSX, windows et Linux are supported

For Windows, download the installer following this link:

client_lina_windows.exe

For MacOSX, download the installer following this link:

Lina_MacOSX.dmg

For Linux, download and open one of the archives and follow the instruction inside : Lina_Redhat.tgz Lina_Ubuntu.tgz

For better identification of your computer it's a good idea to set the hostname of your computer with an explicit name (hostname)

detailled explanations

installation step (windows)

After downloading the file needed for your operating system, execute it as adminstrator.
